Project

Emoji Game

[project1_link](#)

Technologies used : React JS, CSS

Built an engaging, emoji-based memory challenge for players.

- Implemented React components, lists, event listeners, and conditional rendering to bring the game to life.
- Polished the user experience with CSS styling.

Todos Application

[project2_link](#)

Technologies used : HTML, CSS, JS, Bootstrap

A comprehensive todo management tool designed to enhance productivity.

- User-friendly interface with HTML, CSS, and Bootstrap for ease of use.
- Effortless task management through JavaScript-based CRUD operations with dynamic UI updates.
- Your tasks are always safe with local storage methods to ensure task persistence.

Wikipedia Search Application

[project3_link](#)

Technologies used : HTML, CSS, JS, REST API Calls, Bootstrap

A custom wikipedia search application that provides a simplified and intuitive way for users to access and view relevant information. With the ability to easily search for and view curated results, users can dive deeper into their interests with just a click.

- Streamlined search results with HTML list elements, styled for a modern and user-friendly interface using CSS, Bootstrap and responsive design.
- Effortlessly access information with asynchronous fetch GET HTTP API calls and the option to open the desired result in a new tab for further exploration.
